iWellnessExam & Digital Retinal Photography

The iWellnessExam is a quick, non-invasive scan that allows our doctors to see beneath the surface of your retina. This unique technology combined with digital retinal photos can help our doctors detect vision threatening conditions and systemic diseases in their very early stages, when they are most treatable. Our doctors recommend these tests as a routine part of the comprehensive eye exam for all of our patients. They are a great alternative if you would prefer not have your eyes dilated at this visit. The iWellnessExam and digital retinal photography are especially important if you or your family have a history of diabetes, high blood pressure, high cholesterol, headaches, cataracts, glaucoma, macular degeneration, or other eye conditions. These conditions can be monitored closer and more accurately with these tests. The cost of these procedures is $39. It is not routinely covered by insurance. Please ask our staff if you have any questions.

Please select one of the options below, indicating your choice for the iWellnessExam and digital retinal photography:

□ I wish to have the iWellnessExam and retinal photography performed today

□ I have additional questions about the iWellnessExam and retinal photography
